

Exp-17:

Water marking technique to insert the watermark into the original image.

Code:

```
import cv2

image = cv2.imread('original.jpg')
watermark = cv2.imread('watermark.png')
watermark = cv2.resize(watermark, (150, 150))

h_img, w_img, _ = image.shape
h_wm, w_wm, _ = watermark.shape

x = w_img - w_wm - 10
y = h_img - h_wm - 10
alpha = 0.4

roi = image[y:y+h_wm, x:x+w_wm]
blended = cv2.addWeighted(roi, 1-alpha, watermark, alpha, 0)
image[y:y+h_wm, x:x+w_wm] = blended

cv2.imwrite('watermarked_output.jpg', image)
cv2.imshow('Original Image', cv2.imread('original.jpg'))
cv2.imshow('Watermarked Image', image)
cv2.waitKey(0)
cv2.destroyAllWindows()
```

Output:
