

## Exp-7:

Read captured video in python and display the video, in slow motion and in fast motion.

### Code:

```
import cv2

video = cv2.VideoCapture("sample_video.mp4")

print("Press 'q' to exit")

while video.isOpened():
    ret, frame = video.read()
    if not ret:
        break
    cv2.imshow("Normal Video", frame)
    cv2.imshow("Slow Motion", frame)
    cv2.waitKey(100)
    for i in range(2):
        video.read()
    cv2.imshow("Fast Motion", frame)
    cv2.waitKey(10)
    if cv2.waitKey(1) & 0xFF == ord('q'):
        break

video.release()

cv2.destroyAllWindows()
```

### Output:
